# BLENDEX

BY MILBURN FLOORING SINCE 1959

## EASY TO MAINTAIN

Epoxy flooring is seamless and impenetrable by liquids. They are easy to clean and perfect for hygienic needs and high traffic areas.

## CHEMICAL RESISTANT

Epoxy floors are highly resistant to a wide variety of chemicals.

## RESILIENT

Epoxy floors are resilient and designed to withstand heavy loads and high-impacting machines like forklifts, vehicles, and mechanical equipment.

## SAFETY

With the ability to reflect light well, epoxy flooring is highly visible. When combined with vibrant colors and lines, these flooring systems are perfect for garages, warehouses, and other large spaces.

## DURABLE

Epoxy systems are designed to perform as long-lasting solutions.

## ABOUT US

Blendex by Milburn Flooring's workmanship and dedication to customers has proven to be the key to our success as the leading installers in the field of concrete surface preparation, concrete repair and the installation of urethane, MMA & epoxy flooring and wall systems. With the belief that quality does not cost, it pays, we hold ourselves to the highest standards.

Blendex by Milburn Flooring has worked alongside some of the most widely recognized owners, architects and engineering firms being contracted to write and design flooring specs for the most challenging projects.

## SURFACE PREPARATION

The single most important step to your project is proper surface preparation. Achieving a clean surface with the proper CSP (concrete surface profile) will allow proper absorption into the concrete as well as provide a mechanical anchor to the slab. Blendex by Milburn Flooring offers various types of surface prep equipment to achieve this.

Other key steps include concrete moisture evaluation and determining the correct resin system for the area to be coated. Different resins will perform better in different environments. Cure times will also play a role in deciding which is right for you.
