 - Rubber Tiles

Epoxy flooring is a great option for a variety of environments. For customers looking for an affordable

and long-lasting product, these flooring systems provide a lot of advantages. These high performance and durable systems handle the impacts of heavy machinery, trucks, equipment and chemicals better than most flooring material.

- ✓ EASY TO MAINTAIN
- ✓ CHEMICAL RESISTANT
- ✓ DURABLE
- ✓ SKID/STAIN RESISTANT
- ✓ SAFE
- ✓ RESILIENT

SURFACE PREP EXPERTS

GRINDING

Grinding saves time and money overall on projects. It increases the safety and condition of a surface by turning rough, damaged concrete into a smooth, hard surface prepping it to be in optimal condition for any floor installation.

SELF-LEVEL

Qualities of self-leveling are smoothness, flatness, and compressive strength over that of traditional concrete floors. If the concrete is cracked, has varying elevations, is uneven or sunken then self-leveling is the solution.

MOISTURE MITIGATION

The purpose of any moisture mitigation system is to limit or eliminate the movement of water vapor into the flooring system. This may include water vapor from exterior sources like groundwater, or moisture vapor from a subfloor system itself.

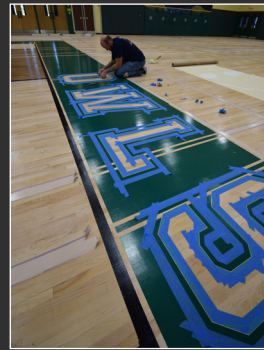

SPORTS FLOORING INSTALLATIONS

HARDWOOD FLOORING PROJECTS

Our hardwood sports flooring systems are extremely durable and designed reduce impact to athletes joints & muscles to benefit their longterm health and career. The only sports surfaces to exceed industry standards through delivering strength, stability, resiliency and comfort during play. We provide flooring systems with subfloors that support heavy loads, gym equipment, and bleachers.

SYNTHETIC FLOORING PROJECTS

These multi-purpose floors are a great alternative to wood gym floors. Requiring low maintenance and being easy to clean these floors allow for and excellent hygienic facility environment. The seamless and smooth surfaced floors have a long life-span with a low life-cycle cost.

- On-Site Floor Inspections
- Sports Floor Specifications
- Estimating & Budgeting
- Project Scheduling
- Game-Line Layout
